SKILLS

Ruby, Ruby on Rails, JavaScript, Node, jQuery, React.js, Redux, Angular, Express.js, SQL, Git, HTML5, CSS3, SCSS, d3.js

WORK SAMPLES

Smedium   Live Site | Github

A Medium.com clone allowing users to make stories, likes, comments, and follows | Rails, PostgreSQL, React, Redux

- Normalized state to maintain scalability keeping frontend state clean and reusable.
- Integrated React-Quill for rich text editing, preserving styling of indents, bullets, and other rich text styles as html strings in the database.
- Outsourced images uploaded by users to Cloudinary which returned unique urls for writing to primary database, decentralizing content.

SF Evictions Analysis   Live Site | Github

Analyzes San Francisco Eviction data from 1997 onwards, inspired by pudding.cool | JavaScript, d3.js

- Utilized d3.js to visualize eviction data and show the relationship of types across years that adjusted with a slider controlled by the user.
- Imported data from SFData then scrubbed and formatted 38K entries that were transformed into custom models.

CampFire   Live Site | Github

Group project to learn a new stack, modelling a social network | MongoDB, Express.js, Angular, Node

- Lead team members with a background in React-Redux through Angular's comparatively unique module and component architecture.
- Implemented user profiles from backend to frontend by adding a custom model on users leveraging mongoose statics.

EXPERIENCE

Real Estate Salesperson
Marker Real Estate   Jan 2015 - Current
- Sole developer of yukichikawada.com, using Angular. Following Material Design principles, Angular Material library components comprise the layout which connects to a Firebase backend collecting visitor contact information.
- Successfully advised and delivered buy-side clients opportunities to acquire property with minimal missed attempts through quick relationship building, in a fast paced environment, with sell-side agents while using fair negotiation tactics.
- Commended in brokerage for phone savvy handling of new online generated leads known to be fickle.

Assistant Director of Operations
Match Analysis - Soccer Stats and Analysis Startup   Mar 2009 - Apr 2014
- Led staff of 40 in coordination with clone office in Mexico City to deliver data that averaged 98% accuracy in under 24 hours which was both the most accurate and fastest, industry-wide.
- Oversaw testing, production, and delivery of state of the art player tracking technology that was installed in all 40 Top Tier Soccer Stadiums in North America.
- Produced Live Data Coverage of the 2010 World Cup Final, Netherlands vs Spain for The New York Times Online frontpage with 99% accuracy compared to competitors' who scored under 70%.

EDUCATION

App Academy
Immersive software development course with focus on full stack web development

San Jose State University
BS - Biology (Left studies in good standing Spring 2009 to join Soccer Stats & Analysis startup)
